Applicant

THOMSON LICENSING SA et all.

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/EP2005/050023

	Box No. I Basis of the repo	ort \	
1.	. With regard to the language , this report is based on the international application in the language in which it w filed, unless otherwise indicated under this item.		
 □ This report is based on translations from the original language into the following language, which is the language of a translation furnished for the purposes of: □ international search (under Rules 12.3 and 23.1(b)) □ publication of the international application (under Rule 12.4) □ international preliminary examination (under Rules 55.2 and/or 55.3) 			
2.	2. With regard to the elements* of the international application, this report is based on (replacement sheets we have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in the report as "originally filed" and are not annexed to this report):		
Description, Pages			
	1-10	as originally filed	
	Claims, Numbers		
	1-8	as originally filed	
Drawings, Sheets		<u>-</u>	
	1/2-2/2	as originally filed	
	☐ a sequence listing and/or a	any related table(s) - see Supplemental Box Relating to Sequence Listing	
3.	The amendments have resulted in the cancellation of: the description, pages the claims, Nos. the drawings, sheets/figs the sequence listing (specify): any table(s) related to sequence listing (specify):		
4.	 □ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)). □ the description, pages □ the claims, Nos. □ the drawings, sheets/figs □ the sequence listing (specify): □ any table(s) related to sequence listing (specify): 		
	* If item 4 applies, s	some or all of these sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/EP2005/050023

Re Item V.

- 1 Reference is made to the following documents:
 - D1: MASUMITSU K ET AL: "Meta-data framework for constructing individualized video digest" PROCEEDINGS OF THE INTERNATIONAL CONFERENCE ON IMAGE PROCESSING. ICIP 2001, 7 October 2001 (2001-10-07), 10 October 2001 (2001-10-10) pages 390-393, XP010563365 THESSALONIKI, GREECE ISBN: 0-7803-6725-1
 - D2: MASUMITSU K ET AL: "Video summarization using reinforcement learning in eigenspace" PROCEEDINGS OF THE INTERNATIONAL CONFERENCE ON IMAGE PROCESSING. ICIP 2001, vol. 2, 10 September 2000 (2000-09-10), 10 October 2001 (2001-10-10) pages 267-270, XP010529975 THESSALONIKI, GREECE
 - D3: KWAN W ET AL: "An intelligent agent for multimedia" CANADIAN CONFERENCE ON ELECTRICAL AND COMPUTER ENGINEERING, 5 September 1995 (1995-09-05), 10 October 2001 (2001-10-10) pages 594-597, XP010193748 MONTREAL, CANADA ISBN: 0-7803-2766-7
- The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1 and 8 is not new in the sense of Article 33(2) PCT:
- Device for creating summaries of multimedia documents (abstract, lines 1 to 2) comprising a storage means and means enabling a user to view a multimedia document (implicit in the abstract), characterized in that it comprises
 - means of automatically weighting multimedia documents stored on the storage means ("the importance score of an image sequence can be calculated" abstract lines 7 to 10 this clearly discloses a means for automatically weighting using a score multimedia contents, hence documents, which are implicitly stored on a storage means) according to the frequency with which the different stored documents are viewed by said user (according to the abstract the score attributed is derived from a user profile

- means of automatically weighting documents according to the frequency with which the different documents are viewed by the user; moreover this feature is well-known in the field of user-profiles - the most basic version of a user profile is based on frequency of access to contents of a certain type in the past - refer also to D3, page 595, left-hand column, lines 6 to 10), - means of creating a summary of the multimedia documents stored on the storage means according to the weighting assigned to each multimedia document (abstract, lines 10 to 14).

These are all the features of independent claim 1, it follows that the subject-matter of independent claim 1 is not novel.

- 2.2 Independent claim 8 describes a method with features that correspond to those of the system of independent claim 1. It follows that independent claim 8 is not novel for the same reasons as given above for independent claim 1.
- Dependent claims 2-7 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty (Article 33(2) PCT), the subject-matter of said dependent claims being disclosed in document D1 (refer to the references to this document provided below). D1 discloses that:
 - a summary is only created for the documents for which the weighting coefficient is greater that a predefined threshold (claim 2 disclosed in the abstract, lines 10 to 14)
 - the documents are weighted according to their type (claim 3 disclosed in "predefined keywords" in the abstract and in "similar content" on page 391,

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/EP2005/050023

- right-hand column lines 18 to 21)
- the documents are divided in scenes and scenes are weighted (claim 4 disclosed on page 391, left-hand column, lines 4 to 6)
- the summary is created according to the weighting assigned to the scenes (claim 5 disclosed on page 391, left-hand column, lines 25 to 30)
- the duration of the summary is adapted according to the weighting assigned to each document and to each scene (claim 6 page 291, left-hand column, lines 25 to 30 and figure 1 implicitly disclose this possibility; note moreover that the relation of weighting and duration is well known in the field refer to D2, page 269, left-hand column, lines 7 to 12)
- the summaries are stored in storing means (claim 7 this is implicit on page 391, left-hand column, lines 25 to 30: a summary is created, it must accordingly be stored somewhere)
